AI FOR LEGAL GOVERNANCE
HACKATHON 2026

DATE

June 2026

PROBLEM STATEMENT

Jurisync

AI for Legal Integrity

Generative AI has created **new risks** that existing systems are not designed to solve.

TRADITIONAL DETECTION FAILS

Relies on exact text matching and cannot catch semantic paraphrasing.

AI-DRIVEN PARAPHRASING

AI rewrites bypass plagiarism checkers and appear original.

NO PROVENANCE VERIFICATION

Lack of source attribution makes ownership claims unverifiable.

UNCERTAIN COPYRIGHT STATUS

Legal status of AI training data and AI-generated works remains unclear.

INACCESSIBLE INFRASTRUCTURE

Originality verification tools are costly and unavailable for most institutions.

HIGH REPUTATIONAL & LEGAL RISK

AI misuse can lead to copyright violations, penalties, and loss of credibility.

The AI copyright and plagiarism problem is not purely technical.
It is simultaneously a legal, ethical, and institutional governance challenge requiring solutions that operate at all three levels concurrently.

EXISTING SOLUTIONS GAP

Jurisync
AI for Legal Integrity

Most tools detect copied text. **None provide end-to-end AI governance.**

CAPABILITY	EXISTING SOLUTIONS (Turnitin, iThenticate, GPTZero, etc.)	JURISYNC (AI-Powered Governance Platform)
 Textual Similarity Detection	✓ Yes	✓ Yes
 AI-Generated Content Detection	~ Limited / Partial	✓ Yes
 Semantic Plagiarism Detection	✗ No	✓ Yes
 Copyright Risk Analysis	✗ No	✓ Yes
 Provenance & Watermark Tracking	✗ No	✓ Yes
 Explainable Legal Summaries	✗ No	✓ Yes
 Governance & Compliance	✗ No	✓ Yes
 Open-Source & Extensible	~ Partial / Closed	✓ Yes
 Institutional API Integration	~ Limited	✓ Yes

EXISTING TOOLS

Built for the copy-paste era.

Focus on text matching and similarity.

JURISYNC

Built for the AI era.

Focus on meaning, provenance,
copyright risk & governance.

WHY JURISYNC MATTERS

Jurisync
AI for Legal Integrity

Because AI Governance Requires **More Than Detection.**

DETECT

AI-generated content,
semantic plagiarism,
and hidden similarities.

VERIFY

Content provenance,
authorship, and
attribution with
confidence.

PROTECT

Creators from copyright
risks and unauthorized
reproduction.

GOVERN

Enable institutions to
enforce compliance and
AI governance at scale.

IMPACT ACROSS STAKEHOLDERS

FOR STUDENTS

Promotes academic
integrity and originality.

FOR CREATORS

Protects intellectual
property and rights.

FOR INSTITUTIONS

Strengthens compliance
and reduces legal risks.

FOR LEGAL TEAMS

Provides explainable
evidence and risk reports.

**JURISYNC TRANSFORMS PLAGIARISM DETECTION INTO
A COMPLETE AI GOVERNANCE INFRASTRUCTURE.**

AI CONTENT DETECTION ENGINE

Jurisync
AI for Legal Integrity

PURPOSE

Determine whether the content appears:

HUMAN-WRITTEN

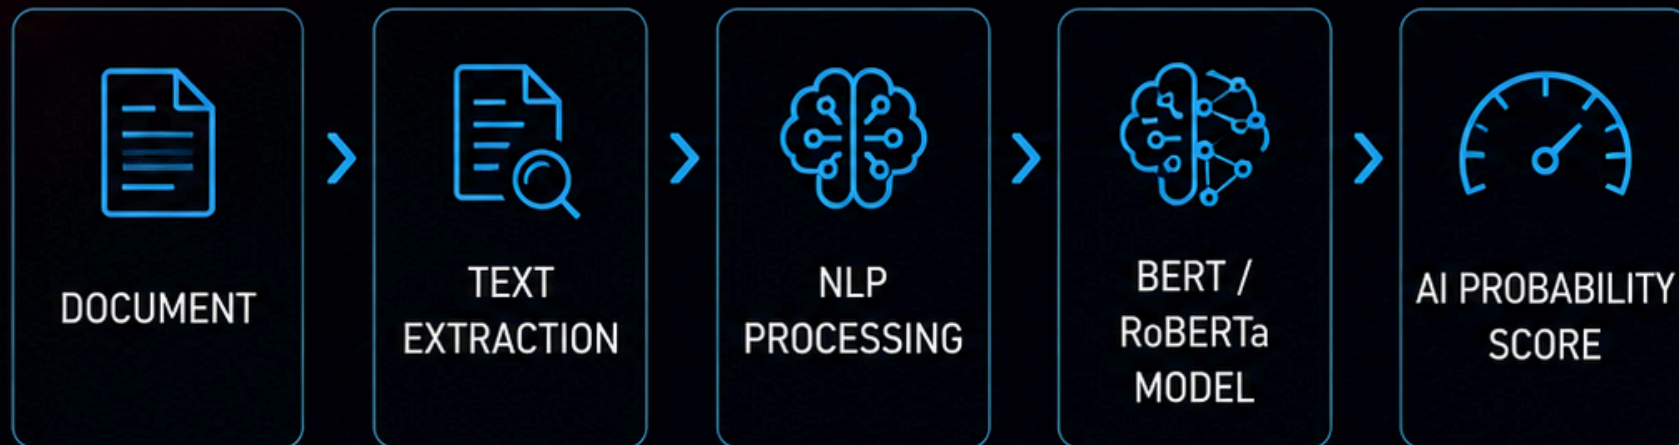

AI-ASSISTED

FULLY
AI-GENERATED

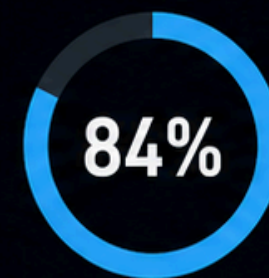

TECHNICAL PROCESS

THE MODEL CHECKS

- ✓ Writing consistency
- ✓ Burstiness
- ✓ Perplexity
- ✓ Repetition patterns
- ✓ Prompt-style outputs

EXAMPLE OUTPUT

AI PROBABILITY:

84%

LIKELY AI-ASSISTED

SEMANTIC ANALYSIS ENGINE

This is where **Jurisync** becomes different.

Jurisync
AI for Legal Integrity

! PROBLEM

Traditional systems check:

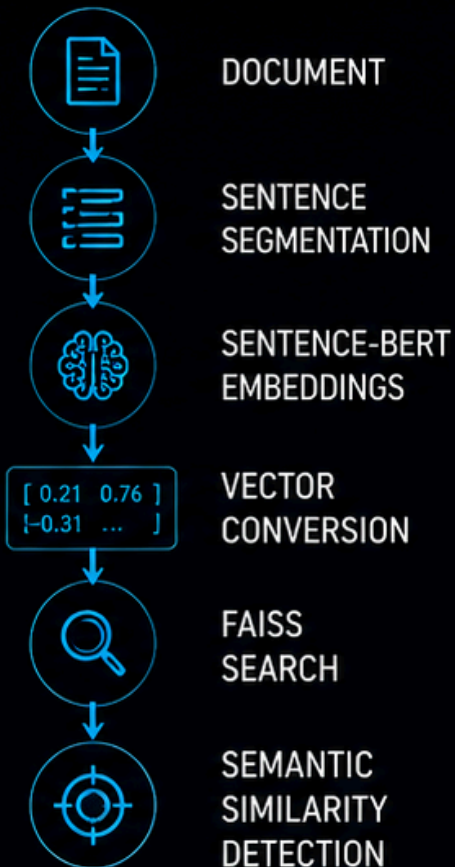

WORD MATCHING

Jurisync checks:

MEANING MATCHING

⚙️ TECHNICAL PROCESS

★ EXAMPLE

ORIGINAL SOURCE:

Copyright protects literary works.

STUDENT SUBMISSION:

Literary creations are protected by copyright law.

TURNITIN:

LOW SIMILARITY

JURISYNC:

HIGH SEMANTIC SIMILARITY

COPYRIGHT RISK ANALYZER

Identify potential copyright and authorship risks before content is submitted, published, or distributed.

Jurisync

AI for Legal Integrity

WHAT IT ANALYZES

- ✓ Copyright Infringement Risk
- ✓ Derivative Work Risk
- ✓ Substantial Similarity
- ✓ Attribution Gaps
- ✓ Fair Dealing / Fair Use
- ✓ Licensing & Ownership Issues

HOW IT WORKS

RISK ASSESSMENT

HIGH

COMPLIANCE RECOMMENDATIONS

If Similarity is High

→ Rewrite flagged sections and add independent analysis.

If Attribution is Missing

→ Add proper citation (APA / MLA / Bluebook).

If Derivative Work Risk Exists

→ Seek permission or substantially transform content.

If Fair Dealing Applies

→ Restrict use to educational, research, criticism, or review.

If AI Content Creates Risk

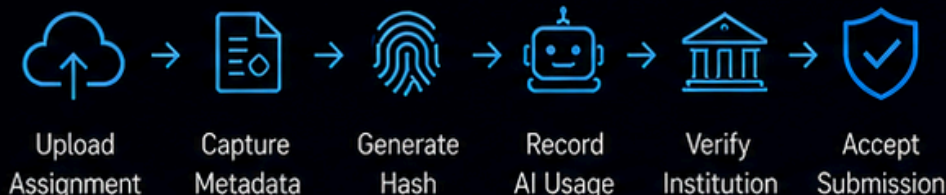

→ Verify originality and disclose AI assistance where required.

STUDENT SUPPORT

- ✓ Explains copyright obligations
- ✓ Detects risky content
- ✓ Suggests citations and references
- ✓ Improves originality and compliance
- ✓ Guides responsible AI usage

STUDENT WORKFLOW

LEGAL MAPPING

- Copyright Act – Infringement & Fair Use
- Attribution & Citation Standards
- Ownership & Licensing Considerations
- AI Disclosure & Transparency

KEY OUTPUT

Risk Score

Risk Assessment

Attribution Analysis

Compliance Recommendations

Legal Guidance

PROVENANCE TRACKING

Establishes a verifiable chain of ownership, authorship, and content history for transparent and accountable AI content.

COMPLIANCE REPORT GENERATOR

Jurisync
AI for Legal Integrity

All previous findings are **combined**.

INPUTS

FINAL REPORT

	Originality Score	76%
	AI Probability	84%
	Semantic Similarity	68%
	Copyright Risk	High
	Provenance Status	Verified

RECOMMENDATION:

Review attribution and obtain permission before publication.

IMPACT

Creating a Safer, Fairer & Accountable AI Ecosystem

Jurisync drives meaningful impact across institutions, creators, and society by ensuring transparency, accountability, and compliance.

ACADEMIC INSTITUTIONS

-  Strengthens academic integrity
-  Reduces AI-assisted plagiarism
-  Standardizes originality assessment

CREATORS & RESEARCHERS

-  Protects intellectual property rights
-  Raises copyright risk awareness
-  Ensures provenance and attribution

REGULATORS & GOVERNANCE

-  Supports policy & compliance monitoring
-  Provides tech-enabled governance infrastructure
-  Enables data-driven decision making

LEGAL & COMPLIANCE TEAMS

-  Streamlines compliance workflows
-  Evidence-backed risk assessment
-  Audit-ready reports and documentation

SOCIETY AT LARGE

-  Builds trust in digital content
-  Reduces misinformation & unethical use
-  Encourages responsible AI adoption

Jurisync empowers a **transparent, trustworthy, and legally compliant** AI ecosystem that benefits individuals, institutions, and society.

CHALLENGES & RISK MITIGATION

Anticipating challenges. Building responsible solutions.

CHALLENGES

FALSE POSITIVES

Risk of misclassifying human content as AI-generated.

LEGAL UNCERTAINTY

Evolving copyright laws and AI regulations.

ADVERSARIAL ATTACKS

Evasion techniques to bypass detection.

PRIVACY CONCERNS

Risk of data misuse and surveillance.

CROSS-JURISDICTION COMPLEXITY

Different copyright laws across regions.

RISK MITIGATION

MULTI-MODEL VALIDATION

Ensemble models with human review for accuracy.

JURISDICTION-AWARE FRAMEWORK

Built-in legal rules with continuous updates.

ADVERSARIAL TRAINING

Continuous model hardening and anomaly detection.

DATA PRIVACY BY DESIGN

Encryption, minimal retention, and access control.

MODULAR & CONFIGURABLE RULES

Region-specific compliance and policy configuration.

JURISYNC
AI FOR LEGAL INTEGRITY

CONCLUSION

Jurisync empowers a **transparent, accountable,**
and **legally compliant** AI ecosystem.

DETECT

AI-generated content
and plagiarism

VERIFY

Provenance and
copyright risk

GOVERN

With legal alignment
and compliance

EMPOWER

Institutions, creators
and society

Together, let's build a safer, fairer, and accountable
future for **AI-powered content**.
